

MISSOURI OER

Open resources for PreK-20 educators

A Central Place to Share Quality Open Educational Resources

MOREnet, in cooperation with the Department of Elementary and Secondary Education, has developed the Missouri Open Educational Resources Commons (OER) for Missouri educators at all levels.

The Missouri OER offers a wide selection of resources that include:

- full courses
- course materials
- modules
- videos
- tests
- other tools and techniques

These resources are intended to fit with the current work and initiatives happening in schools, providing a space to share resources and ideas.

In addition to curriculum, you will find OER awareness, resources, support, and training. Join us as we curate and create quality open educational resources that are aligned specifically to Missouri learning standards.
