

# EQUITY and LITERACY

How the Science of Reading  
benefits *all* children

In person event

Hosted by Kansas City RPDC

Dr. J. Michael Pragman

30 West Pershing Road, Union Station Ste. 401, Kansas City, MO 64108

# The Superkids

Reading Program

Equity is essential for *all* students to thrive and there has never been a more promising time in education. With evidence-aligned instruction, up to 95% of our children *can* learn to read!

The time is now for us to ensure diversity is welcomed into the classroom in a way that gives all students a chance to succeed. This needs to be true regardless of their socioeconomic standing, race, gender, or ability.

The tremendous insights into the process of learning to read, and the current research embodies the **science of reading**.

Learn more about these principles at our complimentary professional development event. We will examine current barriers to equity, the theoretical models and best practices of brain-based literacy instruction, and the **new MO teacher licensure requirements** so that ALL children can thrive.\*
