

Using Curriculum Improvement Cycles to Enhance Curriculum Writing

Webinar

Sometimes, when it comes to curriculum writing, you have to stop...reflect...and rethink what you are doing and what has been done. The curriculum we write should not only benefit our teachers, both present and those to enter our districts later, but should also be written to meet the needs of our students, community, and DESE mandates.

This **interactive training** will walk you through the steps of the Curriculum Improvement Cycle. Participants will learn how this process can not only help you write a guaranteed and viable curriculum, but also help ensure that it is written in a way to benefit the students.

We will start the training by taking a look at why we need to have a written curriculum, then we will dive into the five steps of a Curriculum Improvement Cycle: Evaluate & Diagnose; Prioritize & Set Goals; Develop and Plan; Curriculum Writing; and Implement and Monitor. By going through the process, individuals will walk away with the knowledge needed to know where to either start or where to head next in their curriculum writing and implementation journey.
