

In-District Curriculum Reviews and Audits

The Show-Me Curriculum Administrators Association (SMCAA) exists to provide support and training for Missouri school leaders in Curriculum, Instruction and Assessment. We believe Curriculum is the focus of our work, and that a strong curriculum will provide what is necessary for quality teaching and learning.

One of the many services SMCAA provides includes In-District Curriculum Reviews and Audits. Designed in a way to provide an outside look at your curriculum, SMCAA curriculum reviews include the following:

- An overall review of the overall content requirements
- A review of unit construction (looking at content, logical instructional order, horizontal alignment, etc)
- Assessment alignment
- Debriefing with your team (usually a half hour to cover the findings)
- A written report with process, findings, and recommendations

Other curriculum review packages include an in-depth data analysis of MAP exams (grade-level, EOC, MAP-A, and WIDA) and the curriculum support of these areas.

Each curriculum review and audit is tailored to meet the needs of YOUR individual district. Pricing and costs involved will vary depending on the size of the district, the work down, and the number of content areas reviewed. When you are ready for your curriculum review, reach out to Julie Riley by email at jriley@smcaa.org or by phone at 833-935-5739.

We look forward to partnering with you in the near future!
