

Tailored Professional Development for Your District Needs

The Show-Me Curriculum Administrators Association (SMCAA) exists to provide support and training for Missouri school leaders in Curriculum, Instruction and Assessment. We believe Curriculum is the focus of our work, and that a strong curriculum will provide what is necessary for quality teaching and learning. There are times, though, when districts may need additional support beyond curriculum writing and implementation...and we are here to help meet those needs!

In addition to our yearly conferences, symposiums, and core process and development training offerings, SMCAA also provides in-district training and support. Some of the district training and professional development offerings available include (but not limited to)...

- Champion Teaching
- Curriculum Design and Standardization
- Developing and Using Proficiency Scales
- Non-Core Support
- Quality Feedback in the Classroom
- Standards Based Learning
- Student Engagement
- Understanding by Design
- Using Learning Stations
- Deep Dives into Understanding Your APR

In addition to the items listed above, any of our core process and development training sessions can be tailored to meet the needs of your teachers.

Whether you are updating your curriculum or looking for high-quality professional development for your staff, SMCAA is here to meet your needs. For additional information, contact Julie Riley by email at jriley@smcaa.org or by phone at 833-935-5739.

We look forward to partnering with you in the near future!
