

ACT Instructional Mastery (AIM) Trainings

“ACT WorkKeys: Data to Improve Learning Workshop” and “ACT Workkeys Curriculum: A School and Student Focused Workshop”

**Jackson R-II School District
October 17, 2025
8:30 a.m. – 3:30 p.m.**

The ACT WorkKeys: Data to Improve Learning Workshop blends the review and analysis of your ACT WorkKeys data at the individual student, group, and or school levels. There will be an emphasis on making connections between the data and skills associated with each school level of the assessments and how that data apply in industry. Both trainers will help better prepare you to help increase your students college and career readiness!

The ACT WorkKeys Curriculum: A School and Student Focused Workshop is activity-based and designed to bring your staff up to speed in using WorkKeys Curriculum in a school setting. You will be provided powerful insights and examples on how to incorporate WorkKeys Curriculum into the school instructional day and how to use the data to monitor your students' progress.

This workshop combines the two 3-hour workshops ACT WorkKeys: Data to Improve Learning Workshop and ACT WorkKeys Curriculum: A School and Student Focused Workshop. Does your school give the WorkKeys to your students? Do you also have WorkKeys Curriculum accounts that you feel you can get more from for your students? The first 3-hours of the workshop provides your educators with the knowledge necessary for preparing your student in taking the ACT WorkKeys NCRC assessments. The second 3-hours of the workshop will focus on WorkKeys Curriculum. The program provides both individual and classroom instructional support in the skills outlined to the WorkKeys NCRC assessments. Note: This workshop is designed for schools that have licenses to WorkKeys Curriculum.

Learning Objectives:

- Understand the design of the program and how to best deliver this software program to those students you determine to provide access.
- Discover the knowledge and skills outline that was built to match the WorkKeys NCRC.
- Learn the variety of ways that educators can implement WorkKeys Curriculum into the school day leading up to your students taking the WorkKeys NCRC assessments.

These sessions are ideal for counselors, rootED advisors, college & career readiness advisors, principals, curriculum coordinators/directors, and CTE staff.
